

### FACT...

Research shows that children who have learning disabilities do better spatially and verbally when using technology, are more likely to follow classroom instructions.

### FACT...

Children learn best in hands-on, multisensory environments. They learn better when they can see, hear, touch, and move. Technology provides a multisensory learning environment.

### FACT...

Technology is more accessible for the most and greatest number of children with disabilities. Technology is more accessible for the most and greatest number of children.

## Let's Talk Month

Winter, Spring, Summer, Fall. Talk with your children about our story, read to hear it from you.

### 10 Tips on Finding a Learning Disability Child

1. Look for your child's strengths. They may have a strong verbal ability but struggle with reading or math.
2. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
3. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
4. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
5. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
6. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
7. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
8. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
9. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
10. Ask your child's teacher for more information. They may have a learning disability but not be labeled as such.
